Mr. Louis F. Schoenfeldt  
International Teletrac Systems  
1725 Winnetka Circle  
Rolling Meadows, Illinois 60008

Dear Lou:

I wanted to take a moment to tell you how much our department appreciates the amount of work you and your staff have done on the behalf of teletrac, and by extension, our department.

We sincerely believe that your tracking system will have a tremendous impact on vehicle theft. We also know it will have numerous other applications that will enhance our ability to provide essential services to the citizens of our community.

With ten tracking units installed in our vehicles, we have used the system several times to track personnel who have failed to answer their radio because of equipment malfunctions. I know our personnel feel much safer knowing we can locate them within seconds without their help in times of need.

In conjunction with your staff, we have performed several simulated stolen vehicle episodes. In each case, our personnel have been able to locate the stolen vehicle. In the last couple of cases, we located the vehicle within three minutes of receiving the report of the stolen vehicle. That alone has to speak highly of your product.

Thank you again, and we are looking forward to a long and beneficial relationship.

Lieutenant George L. Scherm  
Technical Services Division

Mr. Bill Horton  
Law Enforcement Liaison  
International Teletrac Systems  
524 East Lamar Blvd., Suite 120  
Arlington, Texas 76011

Dear Bill:

As I recall the meeting we had April 18, 1991, when we discussed the Teletrac system, I want to emphasize my concern that the coverage to your system cannot be extended to critical areas in the state due to regulatory issues.

As you may remember, we discussed the possibility of extending your system to cover the Rio Grande Valley, which is where many of the stolen vehicles are driven. Since it could be to our benefit to cover that area from either the Dallas/Fort Worth or Houston areas, we hope your regulatory constraints can be removed as soon as possible.

Sincerely,

Roy L. Newman, Commander  
Motor Vehicle Theft Service

Dear Lou,

I would like to take this opportunity to extend my sincere appreciation to you and to all the personnel of the Chicago Operations of International Teletrac System for your efforts in assisting the Chicago Division of the Federal Bureau of Investigation (FBI) over the previous six months. I would especially like to commend the efforts of yourself. Bob Mance.

April 2, 1992

Dear Mr. Rich:

I would like to thank you for your persistence in selling the Teletrac system to me. When you first gave me a demonstration I was skeptical of the application for my company. However, I have since discovered that the Teletrac system is indispensable to my business.

In the last six months, we have had three of our vehicles stolen. By using the Teletrac system, the three vehicles were all recovered in a short amount of time. In two of these instances, suspects were apprehended for the theft.

If I can be of service to you or Teletrac, please do not hesitate to call me.

Sincerely,

  
Rick Hernandez  
President

Mr. Arnold Peller  
International Teletac Systems, Inc.  
9800 La Cienega Blvd.  
Inglewood, CA 90301

Dear Mr. Peller:

I would like to take this opportunity to express my satisfaction with the Teletac stolen vehicle location system. As you know, my daughter was driving my Jeep Cherokee on December 15, 1991, when she was pulled over and the vehicle was taken from her at gunpoint. She immediately called me and I notified the police and the Teletac control center.

The Los Angeles Police Department officers were immediately on the scene, began chasing the thieves and were able to apprehend them in a short time. The chase ended with the suspects in custody and my daughter safe at home. I was truly impressed listening to the exchange of information between Teletac and the police during the high speed chase.

Teletac was able to provide quick and accurate information to the officers, so they never lost the suspects.

Sincerely,

A handwritten signature in dark ink, appearing to read "Phillip Bailey", written over a horizontal line.

To the Commission:

Re: RM No. 8013

The Coral Gables Police Department has used the PacTel Teletrac system in our City to dramatically enhance our surveillance capabilities and allow us an increased measure of officer safety.

We understand the Commission is considering proposals that could make the Teletrac system lose some significant capabilities. We feel any decision that would diminish PacTel Teletrac's ability to

Re: RM.No. 8013

To The Commission:

The Chicago office of the United States Postal Service has entered into a contract with PacTel Teletrac. USPS has been improving productivity, thereby reducing costs and increasing our responsiveness to our customers. Teletrac is aiding us in that effort.

Two hundred new USPS vehicles serving the Chicago area have been equipped with Teletrac units since 1992.

We are using Teletrac to manage our fleets and to increase the personal security of our drivers and to route personnel. We expect to expand our use of the Teletrac system, further decreasing our costs.

Should the Commission require additional information, please feel free to contact us.

Ms. Donna Searcy  
Secretary  
Federal Communications Commission  
Room 222  
1919 M Street, NW  
Washington, DC 20554

RM-8013

Dear Ms. Searcy:

Reference Rulemaking Petition 8013.

In executing its legislative mandate, the Federal Bureau of Investigation (FBI) is required to follow vehicles, packages and persons. The introduction and implementation of commercial radiolocation services has given us a significant capability to accomplish this task. It would not be practical for the FBI to fund or to develop such services if they were available from the private sector.

It is our understanding that the Commission is considering permanent rules for radiolocation services. Without making public the specific ways in which the FBI is utilizing these services, our surveillance capabilities have been significantly enhanced by the use of these commercial services. Very positive results are being obtained daily in on-going FBI investigations. The use of these services by our field offices in the metropolitan areas where the service is available is rapidly increasing.

The FBI supports in principal those requests found in the referenced rulemaking petition. This includes the co-channel separation requested for AVN systems. The FBI hopes that the Commission weighs all issues carefully to prevent any
